Radiation Exposure
Management &
Compliance Services

RADIATION SAFETY

We all play a role in reducing radiation exposure.

Facilities that provide imaging or use radiation-producing materials require Radiation Safety Programs. With SEC^{3}URE, all Healthcare Industry Representatives (HCIR) are now part of the compliance solution, closing the safety gap most facilities, vendor reps, and vendor companies are working to close.

COMPLIANCE

Is your facility compliant? Occupational visitors should practice the same guidelines in regards to occupational radiation exposure as your staff. This includes vendors with a program licensed by the Nuclear Regulatory Commission (NRC) and Agreement States.

STANDARD

IntelliCentrics SEC^{3}URE monitors occupational visitors wherever they perform their duties. Their badge travels with them so you are able to view accurate exposure reports. Best of all, no cost and no additional action is required on your part.
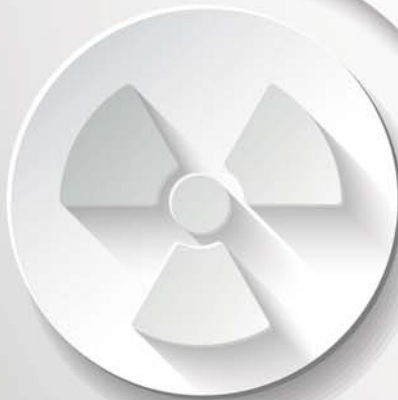

CUMULATIVE

IntelliCentrics SEC^{3}URE is a freeservice to your facility. Radiation Safety Compliance is now part of the SEC^{3}URE standard as part of our baseline service. The program will assure all HCIR meet compliance and education standards.

EDUCATION

SEC^{3}URE University includes comprehensive radiation safety training. Occupational Visitors will understand how to protect themselves as well as others in the facility.

HOW DOES THE **IMPLEMENTATION PROCESS** WORK?

PRESENTATION/DEMO

- An IntelliCentrics SEC^{3}URE representative will host an onsite or web-based meeting to help you understand our benefits and solutions.
- Invite key decision makers such as department supervisors, radiation safety officers, patient safety officers, risk managers, and regulatory/compliance officers.

STAFF COMMUNICATION/EDUCATION

- IntelliCentrics will provide communication materials for all staff and commercial visitors
- We will provide your radiation safety officer IntelliCentrics website training specific to your facility.
- IntelliCentrics will provide your facility with necessary tools. Brochures, and posters will be provided to assist with the implementation process.

POLICY IMPLEMENTATION & COMPLIANCE

- IntelliCentrics will help establish a sufficient "Go Live" date that gives all occupational visitors ample time to complete requirements and receive their dosimetry badges.
- All commercial visitors in appropriate clinical areas will be monitored for cumulative occupational radiation exposure.
- IntelliCentrics will assist in identifying the clinical areas suitable for monitoring.

OCCUPATIONAL & COMMERCIAL VISITOR (VENDOR) POLICY & PROCEDURE CONSULT

The consultation will include a review of your current occupational radiation exposure policy and provide language for including occupational visitors. IntelliCentrics will share best practices related to industry compliance to incorporate into your policies.

IntelliCentrics will demonstrate how we are able to track cumulative radiation exposure.

OCCUPATIONAL VISITOR COMMUNICATION AND EDUCATION

- IntelliCentrics will assist with communication between your facilities and your vendor community.
- Occupational visitors, including vendor representatives, will log on to www.SEC3URE.com to complete the Radiation Safety Course and sign up to receive quarterly radiation dosimetry badges.

About Us

As the leader in radiation exposure management and compliance services, IntelliCentrics can be your guide to radiation safety for every role. Through our managed services, you gain immediate access to in-depth radiation safety knowledge and experience. IntelliCentrics maintains a SEC^{3}URE database providing accurate cumulative data for institutions and corporations required to maintain strict radiation safety and compliance. IntelliCentrics SEC^{3}URE is the only program that assists facilities with protecting their commercial visitors from radiation exposure.

IntelliCentrics
Experience SEC³URE Healthcare

IntelliCentrics is driven by a single purpose which is to bring broad public awareness to the principle that we all play a role in obtaining quality patient care by creating a safe and SEC³URE healthcare experience. IntelliCentrics is a leading provider of managed services that help healthcare leaders execute and maintain compliance programs resulting in safer and more SEC³URE facilities. IntelliCentrics is part of a 20-year-old, multinational company operating in the technology sector and within the security services industry for healthcare.
