

First there was **Credentialing**

Then there was **Privileging**

Now there's

# SEC<sup>3</sup>URE Ethos

## Trust has the power to transform healthcare

We are all patients. One of the things that connects all of us is our desire to have access to the highest quality of care for ourselves and our families. Our health plays the most significant role in our quality of life. That's why having access to the best care is so important.

IntelliCentrics understands that the quality of our healthcare is in the hands of our caregivers and that it all comes down to **trust**.

### That's why IntelliCentrics created the SEC<sup>3</sup>URE Ethos

The **SEC<sup>3</sup>URE Ethos** creates two-way **trust** making it possible for everyone to **trust** one another. This includes the relationships between every person involved in care – from patients to doctors to vendors to volunteers and even the locations in which care is received.

With **trust**, we all make better informed decisions and have more choices.

# Trusted Solution

The IntelliCentrics **SEC<sup>3</sup>URE Ethos** is the world's largest trusted healthcare community and it's built on three core principles:

- 1—**Transparency**
- 2—**Neutrality**
- 3—**Independence**

The value of the **SEC<sup>3</sup>URE Ethos** is that it builds bilateral trust between all stake holders across the entire continuum of care.

Patients can trust the doctors they visit, providers can trust the hospitals they work in, and hospitals can trust that their reimbursements are safeguarded because they can trust their practitioners and vendors comply with the regulations.

## The World's Largest Trusted Healthcare Community

The **SEC<sup>3</sup>URE Ethos** is relied on by more than 11,000 locations worldwide to ensure two-way trust between patients, doctors, suppliers and healthcare companies. And at over 700,000 members strong, we're all part of making healthcare better.

**SEC<sup>3</sup>URE Ethos**
