## OUR COMPANY

With a mission to use trust to make high-quality healthcare as accessible as a good cup of coffee, IntelliCentrics created the SEC<sup>3</sup>URE Ethos technology platform. More than 11,000 locations of care worldwide rely on the platform to ensure a safe care environment. IntelliCentrics is publicly traded on the Stock Exchange of Hong Kong Limited ("SEHK") under the stock code 6819.

## CORE PRINCIPLES

Built on the principles of neutrality, transparency, and independence, the SEC<sup>3</sup>URE Ethos is transforming healthcare by delivering trust as a technology. The idea is that everyone wins when interactions can be trusted across the complex spectrum of care. This includes interactions between doctors and patients, doctors and locations of care, and locations and vendors.
