

SEC³URE GO!

Contactless Check-in. Visible Compliance.

Waiting in line to check in at a hospital may take away your valuable time during the visit. With SEC³URE GO! digital badge, check-in is easy and contactless. You are checked in via the SEC³URE mobile app and cleared to enter the hospital when you arrive. Because check-in doesn't require a kiosk, it saves you time and reduces the risk of surface contamination.

SEC³URE GO! is wearable, so you don't need to print a paper badge and your trusted status as well as visit information is visible on the digital badge, while you are onsite at a healthcare facility.

When facilities use SEC³URE GO! as their primary check-in method:

- You are checked in and ready to go upon arrival.
- Your compliance is visually displayed on the badge .
- When check-in is fast, you get more time back to do your job.

You receive a SEC³URE GO! when you sign up for a SEC³URE Passport. It is one of the many benefits of being a member of our SEC³URE Ethos community.
