

SEC³URE LINK

Elevate credentials to the level of trust.

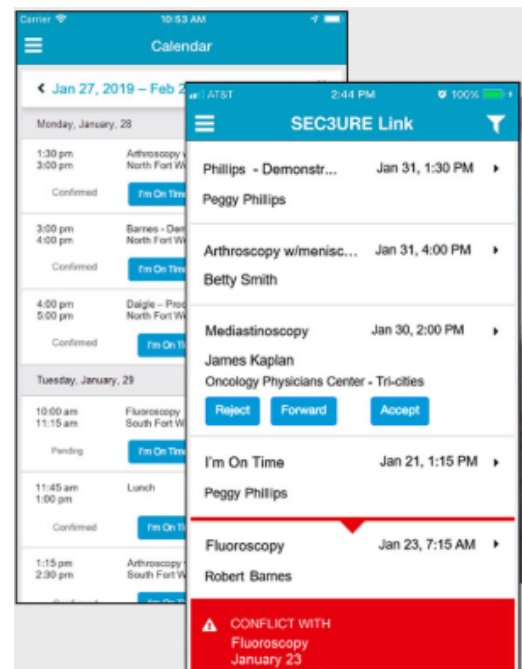

You are needed for a procedure, but information on when and what to bring is missing from the facility that just invited you. You arrive at the facility to support the procedure, only to be told it's been rescheduled. You didn't receive updates because you use a different scheduling system. We know all of this stands in the way of your productivity so we built a technology service that makes it easy to coordinate everything and everyone all at once.

SEC³URE Link connects all procedure elements on one system, allowing all trusted participants to communicate with each other in real time from the moment a procedure is booked through completion.

SEC³URE Link gives you the clarity to do your job:

- As a SEC³URE Passport subscriber, you are already verified and trusted to be scheduled.
- Each procedure is perfectly coordinated, so you have all the details the moment it is scheduled.
- You gain full visibility into your appointments and get updated on last-minute changes instantly.

With SEC³URE Link, you are always prepared for your next case and able to plan around changes as soon as they happen.
