

# SEC<sup>3</sup>URE ETHOS

## for supply chain

Vendor representatives are essential to hospital operations but maintaining control and ensuring rep compliance can be exhausting. We created the SEC<sup>3</sup>URE Ethos to make vendor management easy, with no hardware to support. All vendor reps registered in the SEC<sup>3</sup>URE Ethos are vetted and cleared to be in your facility, so your reimbursements are safeguarded and you maintain total control of who's visiting onsite, when and where.

Digitizing vendor credentialing via SEC<sup>3</sup>URE Ethos means compliance is technology-driven, operational costs go down and efficiencies go up.

### Here's how it works:

- You give us your policies and credentialing requirements.
- We verify that every vendor rep is compliant and trusted.
- Our engagement team assists you every step of the way.

### Being a part of the SEC<sup>3</sup>URE Ethos community, you will:

- Significantly improve your facility's compliance because we monitor vendor credentials diligently.
- Your reimbursements are protected due to compliance.
