

Digitize Vendor Credentialing

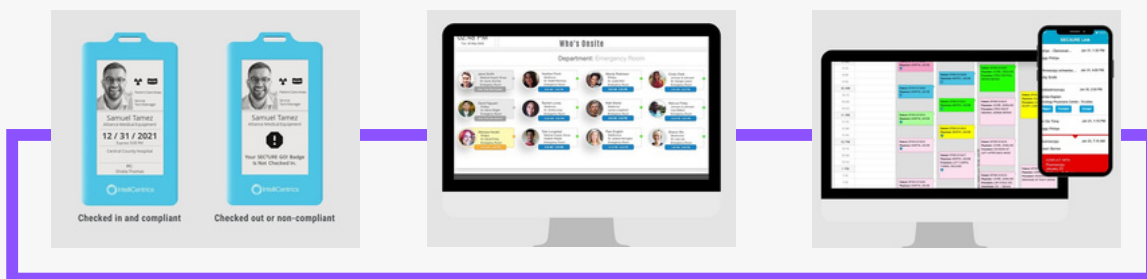

Make credentialing part of your vendor management strategy

Hundreds of people go in and out of your healthcare facility daily. Do you know who's onsite at all times? Are you confident that your vendors have the proper credentials to do their jobs? Can you pass a random CMS audit? Don't worry, we've got your back.

IntelliCentrics works with more than 10,000 healthcare organization to streamline vendor management and ensure the highest level of compliance.

Our technology platform digitizes vendor credentialing, making it an efficient part of your business process instead of an administrative burden, giving you the control of and confidence in who's visiting your facility, and helping you pass compliance audits with ease.

Vendor compliance is also made easy and portable when you pair our credentialing service with these innovative solutions:

**Digital badge for
contactless check-in**

**Real-time onsite
tracking dashboard**

**Credential-integrated
scheduling service**

Let us help you create the most compliant care environment and digitize your credentialing today.
